

DASHBOARD SERIE -2

HD Pro Design Team

WHAT IS THIS?

This is a dashboard that is designed for your cars. Very easy to implement and to use.

WHAT YOU ARE BUYING?

You are buying a complete set of dashboard. Just add it to your game object and change the values from your code.

MORE...

You may find the details in this document or in the link below.

NEW FEATURES

Completely Editable

This dashboard is completely editable. You do not need to carve in to code. Just adjust the values and that is done.

Comprehensive

It includes speed, RPM, Hp, torque, gear and indicators (Abs, Tcs, main short light, main long light, fog light, engine failure, electrical failure, oil amount and fuel amount)

Easy to Implement

The only thing that you have to do is just add the prefab to your game object, copy connection code to your code and change it how you want.

DETAILS

Data update speed: This property sets the update speed for only speed and RPM text in the middle of the dashboard.

RPM Multiplier: This sets the RPM values which are shown in dashboard. For example; if your max RPM is 6000 and you selected 10 for RPM multiplier, you will see rpms as 10 – 20 – 30 – 40 – 50 – 60 on dashboard.

Active, Deactive and In-Use Colors: These colors are the colors of indicators (ABS, TCS, Electrical and Engine Failure.) shown in dashboard.

Long Light and Fog Light Color: These colors are used for the active state of these lights.

Warning and Normal Colors are used for Low Fuel, Low Oil, Electrical and Engine failure.

Car Color is the color of the car icon in dashboard.

Max RPM and Max Speed are the max values which are to be shown in dashboard.

Indicator Images: These image files are located in [Resources>Images>EI](#) folder under the main Dashboard folder. In normal condition they will already added to game objects. If these references brake just add them manually.

Text Fonts: The fonts that you want to see in dashboard.

Speed Unit is the unit of Speed. May be Kph or Mph.

Position Reference For Speed/RPM Texts: This reference is the reference point of speed/RPM step texts. It **must** be [SpeedLowColored](#) image for speed and [RpmLowColored](#) image for RPM texts.

Speed/RPM Sub Seg Count: This properties defines the sub text counts and colored section segment counts.

Speed/Rpm Colors paints the section as you set.
